Chennai, India

INDUSTRIES

Automobile
Pharmaceutical
Manufacturing

SKILLS

Problem Solving, Collaboration,
Communication, Adaptability, Strong
Leadership Skills, Time Management,
Decision Making

EDUCATION

SRM Institute of Science and Technology
**B.Tech-Computer Science
and Engineering**
2019 - 2023
CGPA: 9.33

LANGUAGES

English
Hindi
Tamil
French

PROFILE

Data Professional with 3+ years of experience specializing in GenAI, predictive modeling, and scalable cloud architectures (Azure, Databricks, Snowflake). Proven track record of delivering complex multi-path attribution systems and secure FastAPI web applications that translate advanced AI insights into high-impact executive strategies.

WORK EXPERIENCE

Data Analyst, MathCo

JAN 2023 - Present Bangalore, Karnataka

- Developed and deployed end-to-end generative AI and machine learning models to automate complex text extraction, real-time data lookups, and predictive risk profiling.
- Built scalable, robust data pipelines utilizing Snowflake, Databricks, and PySpark stacks to process raw data and power interactive Power BI executive dashboards.
- Engineered secure, responsive full-stack web applications using Python and FastAPI to deliver intuitive user interfaces for enterprise operational workflows.
- Designed sophisticated multi-path attribution systems and algorithmic data structures to track customer journeys and optimize business conversion metrics.
- Collaborated with executive stakeholders to translate business requirements into high-impact AI and data engineering solutions.

INTERNSHIPS

Full Stack Developer, HighRadius

JAN 2022 - MAY 2022

- Demonstrated proficiency in front-end and back-end development, leveraging a comprehensive full-stack training program. Successfully built dynamic and robust web applications using a range of technologies
- Effectively designed visually appealing user interfaces, ensuring seamless user experiences and responsiveness across diverse devices.
- Developed scalable and secure web applications that delivered optimal user experiences.

Front-End Developer, BizDateUp

JUL 2021 - NOV 2021

- Proficient in Front-end Technologies: Highly skilled in HTML, CSS, and JavaScript.
- Demonstrated expertise in creating visually appealing and responsive user interfaces, ensuring a seamless user experience across different browsers and devices.

Digital Marketing, Viral Fission

JUN 2021 - JUN 2022

Gained practical experience in various digital marketing areas, including social media, content creation, and SEO.

TECHNICAL SKILLS

- **Programming & Tools**

Python, SQL, HTML/CSS, PySpark, Git, FastAPI, LLMs, Postgresql

- **Database Management**

MySQL, Postgresql, Snowflake, Microsoft Fabric, Azure SQL Database

- **Platforms**

Azure, Fabrics, Snowflake, PowerBI, Databricks, Dataiku, Dbeaver, Jupyter, MS Excel

CERTIFICATIONS

- PL-300 Microsoft Certified Power BI Developer
- Advance SQL Cerification on Hacker Rank with a 5 Star Badge
- Professional Full Stack Analytics
- Snowpro core PF - 02
- Machine Learning and Big Data using Python
- Google Cloud Program
- Complete 2021 Web Development Bootcamp

VOLUNTEER EXPERIENCE

- Acted as Technical Lead at the oldest SRM college club, Chipset, overseeing technical events and guiding the team to successful implementations.
- Roe-Bot v1.0 it is a riveting and thought-provoking event that revolved around the topic - Robotic Process Automation (RPA).
- Served as Treasurer in Rotary Club, managing financial operations and ensuring transparent and effective fund utilization.

EXTRACURRICULAR ACTIVITIES

I love assembling computers and exploring hardware configurations. Additionally, I'm passionate about bikes and going on multiple road trips

PROJECTS

Identifying Replacement for Obsolete Parts

- Utilized LLMs to extract technical document data, establishing unified schemas engineered for both RAG systems and future knowledge graph implementations.
- Engineered an advanced search engine combining semantic, keyword, and specification filtering to provide ranked results with confidence scores, real-time lookups, and AI-driven predictive replacement recommendations.
- Empowered sales representatives to deliver rapid, accurate customer recommendations for part replacements and equivalents.

Enhancing Sales Lift through Incentive Optimization

- This project leverages ML and SHAP analysis to assess the impact of incentives on sales performance for one of the world's largest car manufacturers, evaluating current incentive strategies and their precise effectiveness.
- Delivered a comprehensive end-to-end solution spanning from raw data extraction in Snowflake through advanced modeling and analytics on Databricks, culminating in interactive visualizations in Power BI.

Customer Lead to Order Attribution

- Built an AI/ML and Regex-driven attribution system to track and map end-to-end customer journeys.
- Optimized lead-to-order conversion rates and visualized key pipeline metrics using executive Power BI dashboards.

Anual Pricing Adjustment

Built dynamic, secure web applications delivering responsive user interfaces for annual pricing adjustments, enabling PMs and GMs to set targets and conduct comprehensive analysis for every financial year.

Configuration Analysis for Lower DOL

This project examined configuration process of a major car manufacturer to pinpoint inefficiencies causing longer Days on Lot (DOL). The goal was to streamline operations, reducing DOL and improving profitability.

Customer Segmentation for Targeted Marketing: Leveraging Data Analytics for Business Growth

Revamped customer segmentation strategies for an international bag manufacturer using data analytics, enabling personalized marketing campaigns and driving substantial business growth through data-driven insights.

Risk Profile of Patients Falling off the Therapy

This project aims to analyze and identify key factors that contribute to patients discontinuing therapy with one of the biggest pharma company in the world, providing insights to mitigate risks and enhance patient retention for improved treatment outcomes.

Payment Due Date Prediction

As a winter internship project on data engineering, I built a web application to help the people working in the Accounts Receivable departments in their day-to-day activities.

CONFERENCES

SENMQTTSET an intelligent intrusion detection in IOTMQTT networks using ensemble multi cascade features.

APR 2023

International Conference on Innovation in Computing and Technology '23
